

Pluralism I

- Thesis: Interface problems are an architectural feature. <sup>cf. Minimalist theory of mind (e.g. predictive coding)</sup>
- brain ev. is conservative
  - theories claim to explain all but succeed only at fragments
    - exhibit 1: association (Skinner → Dickinson)
    - exhibit 2: CTM (by Fodor) → only a & of modules
  - parable of doorbell extension tapping in to signal downstream of transducer

Pluralism II

Thesis: solution to the many philosophical positions  
is to recognize that they are only providing  
models . . . .
