• Two models —

—— phonological awareness

—— syntax - misinterpreted — becomes actual.
(eg genitive → interpreted as plural).

—— language change often driven by incorrect theories.

(eg origin of gendered nouns —
from biological nouns; speakers
assume all nouns must have genders).

What is f.p competence?

fp vs soc. cog.   : social practices vs mechanisms

___

lexical fallacy — 'belief', 'desire' ...

Is there a distinction between what ppl say about fp and. fp itself? Would you expect ppl to recognize as true a phenomenology of fp?

[lexical fallacy paper δ :

Fiske interested in what emotions <u>are</u> – natural kinds

We're interested in ~~that~~ ppl's practices concerning emotions —— folk biology to Fiske's biology]

What are the consequences of Fiske for characterizing folk emotions?]

The social practices enable mechanisms?
